### **Birch Society Appraisal**

One small answer to the letter on the Birch Society that appeared in The Press Apr. 5, signed by R. Bordine.

I agree with the lady from Rocky River that this bulwark against communism has been unjustly criticized. Look at what they have accomplished!

They already have brought to the attention of the American people the names of several Communist tools.

Some of the names mentioned by the president of the Birch Society are former presidents Eisenhower and Truman, former secretary of state Foster Dulles and Allen Dulles.

Now all we have to do is to get the House Committee on Un-American Activities to investigate them and we will be well on our way to success.

This John Birch Society (secret members and all) reminds me of three other organizations in recent history who professed to stem communism. They were known as the Ku Klux Klan, Fascist Party and the Nazi society. Need I say more?
